- 2007 Sold to the OYSTAR Group
- 2013 Sold to ATS Automation, an international company headquartered in Canada

## IWK PROFILE

IWK Verpackungstechnik GmbH focuses on the efficient, precise and attractive packaging of pharmaceutical and cosmetic products.

### CHALLENGES

IWK systems are used in industries that demand very high standards. Improving efficiency and meeting the growing demand for packaging solutions designed for complex product groups places high demands on the engineers. However, they are a decisive driving force in the development of higher performance and more efficient solutions that meet market requirements, while simultaneously underscoring our standard as being an innovation leader.

### PIONEERING SPIRIT

Good ideas are the foundation for profitable growth. These ideas – in combination with the pioneering spirit of the company – have helped IWK create a strong global presence. Since its beginning the company has been well known for focusing on innovations and forgoing new paths. IWK currently holds numerous patents for key technologies and annually invests significantly more than the industry average in research and development, leading to numerous innovations each year.

### INTERNATIONAL

The international organization of IWK helps customers all over the world in finding the best packaging solutions. Local representative offices and partners retain close customer contact and enable reliable and fast service. IWK has two manufacturing locations in Europe and Asia. Today, IWK has approximately 450 employees, most of them located at the company's headquarters in Stutensee, Baden-Württemberg. As part of the international ATS Automation, IWK has a financially strong and exceptional technological partner at its side.

# BUSINESS OVERVIEW

## MACHINES
