| 11:00 PM | End of event |

Launch Dividella NeoAPPLY: The highlight of the day

Witness the power of our new high-speed vial and ampoule labeling machine in action. See how the Dividella NeoAPPLY seamlessly integrates with our high-quality toplevel packaging technology.

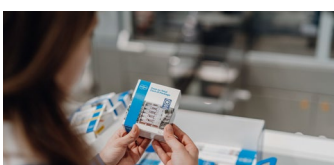

Line.Optimizer: Experience our digital line clearance

Unlock data-driven efficiency across your entire production line. Learn how AI-supported line management and AR-guided procedures can significantly reduce changeover time and boost OEE.

Packaging of medical devices

Explore how Körber is addressing the growing demand for pen and auto-injector packaging. Discover modern packaging technologies tailored for injectable devices and diverse product handling requirements.

Monomaterial packaging development

Follow the sustainable journey of packaging materials from cardboard and partitions to booklets and labels. Gain insights into eco-friendly packaging ecosystems and material stream optimization.
